

Evaluator Background Questionnaire

- 1) Approximately how many years of professional and academic experience do you have in software development/engineering or related fields?
 - I have around 1 years of full-time software development and around 7 years of part time software development
- 2) Approximately how many years of experience do you have designing, developing, or operating systems based on the Microservices Architecture?
 - I never worked with microservices
- 3) On a scale of 1 (Very Low) to 5 (Very High), how would you rate your understanding of microservice principles, patterns, and trade-offs?
 - 2, while I have never worked with microservices, I do read about it, but my knowledge is only theoretical
- 4) Have you ever been *directly involved* in a project focused on migrating or decomposing a monolithic application into smaller services (e.g., microservices)? (Yes/No)
 - No
- 5) On a scale of 1 (Very Low) to 5 (Very High), how would you rate your understanding of the challenges and common techniques related to monolith decomposition?
 - 2, I don't have direct knowledge of monolith decomposition
- 6) How familiar are you with the following microservice communication styles and patterns? (Use a scale, e.g., 1=Not Familiar, 2=Slightly Familiar, 3=Moderately Familiar, 4=Very Familiar, 5=Expert/Extensive Experience)
 - RESTful APIs (using HTTP/JSON)
 - 3, Most project I worked with on web used REST API (though not RESTful)
 - gRPC (using Protocol Buffers)
 - 1, I do know it by name, but never looked at it
- 7) On a scale of 1 (Very Low) to 5 (Very High), how would you rate your understanding of API design principles and best practices (e.g., resource modeling for REST, defining service contracts for gRPC, schema evolution)?

- 3, I am somewhat familiar with api design for the web with REST, but not at all with gRPC.

8) Approximately how many years of *professional* experience do you have developing applications using the Java programming language?

- 0, I have only used javascript, C#, Rust and C++ professionally
