

Evaluator Background Questionnaire

- 1) Approximately how many years of professional and academic experience do you have in software development/engineering or related fields?**

I have approximately 9 years of combined professional and academic experience in software development and related fields

- 2) Approximately how many years of experience do you have designing, developing, or operating systems based on the Microservices Architecture?**

I have no direct experience designing, developing, or operating systems based on the Microservices Architecture.

- 3) On a scale of 1 (Very Low) to 5 (Very High), how would you rate your understanding of microservice principles, patterns, and trade-offs?**

I would rate my understanding of microservice principles, patterns, and trade-offs as 2 – Low. I have some basic knowledge but limited practical experience.

- 4) Have you ever been directly involved in a project focused on migrating or decomposing a monolithic application into smaller services (e.g., microservices)? (Yes/No)**

No

- 5) On a scale of 1 (Very Low) to 5 (Very High), how would you rate your understanding of the challenges and common techniques related to monolith decomposition?**

I would rate my understanding of the challenges and common techniques related to monolith decomposition as 2 – Low.

6) How familiar are you with the following microservice communication styles and patterns? (Use a scale, e.g., 1=Not Familiar, 2=Slightly Familiar, 3=Moderately Familiar, 4=Very Familiar, 5=Expert/Extensive Experience)

- **RESTful APIs (using HTTP/JSON)**
- **gRPC (using Protocol Buffers)**

I have strong experience working with both RESTful APIs and gRPC in various contexts, though not specifically within microservices-based systems.

- **RESTful APIs (using HTTP/JSON):** 4 – Very Familiar
- **gRPC (using Protocol Buffers):** 4 – Very Familiar

7) On a scale of 1 (Very Low) to 5 (Very High), how would you rate your understanding of API design principles and best practices (e.g., resource modeling for REST, defining service contracts for gRPC, schema evolution)?

I would rate my understanding of API design principles and best practices as 3.5 Between Moderate and High.

8) Approximately how many years of *professional* experience do you have developing applications using the Java programming language?

I have approximately 6 years of professional experience developing applications using the Java programming language.
